

## R&D Test Systems is looking for a Project Manager

Job Reference:PLR60

### **Are you dreaming about leading a project team and third parties for the execution of complex projects? Challenge the project team on all levels of the project – also on the technical level?**

R&D Test systems is looking for a Project Manager and a Technical Project Manager who will be responsible for the planning, definition and execution of large and technically challenging test system projects – between DKK 2 and 300 mio.

We are on the lookout for a new colleague who can deliver projects on time, facilitate the technical solutions, negotiate with suppliers and manage the relationship with the customer and stakeholders.

#### **Your role as a Technical Project Manager or Project Manager**

You will be responsible for leading the project team and third parties for the execution of projects. This includes that all projects are delivered on time, within scope and budget. Therefore, you must assist in the definition of the project's scope and objectives, involving all relevant stakeholders and ensuring technical feasibility. The responsibility as a Project Manager also includes the ability to develop a detailed project plan to monitor and track progress.
